

Solving the Grading Puzzle for Students with Disabilities

by Dennis D. Munk, Ed.D.

Solving the Grading Puzzle for Students with Disabilities

\$34.95 © 2003 194 pages
ISBN 0-9708429-7-x

While students with disabilities often spend the majority of their instructional time in general education classrooms, their grades may not adequately reflect the effort, achievement, and progress they have made. In this groundbreaking book, author Dennis Munk outlines a research-based system for school-based teams to use as they seek to demonstrate the academic gains made by students with disabilities. A practical guide for teachers, administrators, and parents, this book will help navigate the philosophical, ethical, and practical complexities associated with designing equitable, effective, and meaningful grading systems. Numerous real-life case studies and reproducible grading adaptation tools facilitate research-to-practice implementation efforts.

Contents

Section 1 Foundations

1. Introduction
2. Overview of grading issues

Section 2 Developing Grading Adaptations

3. Perceptions of what grades, can, should, and do communicate
4. Grading adaptations
5. Evaluating grading adaptations

Section 3 Implementing Grading Adaptations

6. Prioritizing content and related assignments
7. Adjusting the components of a balanced grading system
8. Measuring and grading progress on IEP objectives
9. Measuring and grading improvement
10. Changing scales and weights

Section 4 Communicating Grading Adaptations

11. Issues in calculating and reporting student grades
12. A plan for developing Personalized Grading Plans
13. Grading issues in the news
